DOG SHOT

Treat snapshot and portraits in focus

"Dogs Catching Treats" - funny "snapshots" with thrown treats and head portraits in front of a dark background: these are the most requested motifs, when I reach for the camera.

That's why both variations became a fixed part of every shooting - no matter if in my studio in Germany or "on tour" somewhere in Europe.

OVERVIEW

The most important in short form

Session price: 450 GBP incl. 5 professionally retouched pictures for one dog.

Plus: the entire preview material in small print resolution, printouts of the retouched images and a and 10-GBP shopping voucher for the Vieler-Shop

Delivery of the pictures takes place digitally on a data medium. All retouchings are available in max. resolution.

Plus: Logo version for online publication (e.g. Instagram).

PREPARATION

What do I need to prepare?

Basically nothing at all.

In my work I focus on the strengths of my model and try to produce character portraits with tongue-in-cheek humor.

Accessories of all kinds are used very rarely in my work. Of course you are free to pack favorite collars, bandanas and co.

Treats: If the dog has allergies to certain food and/or is picky about the choice please bring plenty of your best "stuff" ????

On site, however, I also have various snacks, so really only "problem cases" are asked to self-supply
